## EXAMPLE OF A COPAL ROOF

An **aluminum terrace roofing** is a modern and elegant solution that allows you to enjoy your outdoor space throughout most of the year. The durable aluminum profile construction is **corrosion-** and **weather-resistant**, while the safety glass roof provides **excellent interior lighting** and **protection from rain and snow**.

The option of installing the side walls with **COPAL MODERN** or **COPAL CLASSIC** sliding systems allows you to flexibly adapt the space to the weather – they can be fully opened on warm days and closed on cooler days, creating a **cozy, sheltered relaxation area**. This solution combines functionality with modern design, increasing the comfort of your patio and the value of your property.

Maximum width of construction	6000 mm as a single unit
